

Instrument Case 1 for Leica's Family of DISTO™

JMA Technology's Instrument Case 1 is a double walled blow molded case with a custom designed urethane foam insert for carrying the Leica DISTO™ A8, A6, A5, A3 and Plus laser distance meters.

This 9.5"x6.5"x3.5" grain textured plastic case will protect your DISTO™ equipment from damage while traveling from the occasional fall, drop or equipment slamming into the instrument.

This case is unaffected by cold, heat or chemicals. The case will not split, splinter, crack, scratch or rust.

This light weight instrument case will protect your DISTO™ like a rhinoceros.

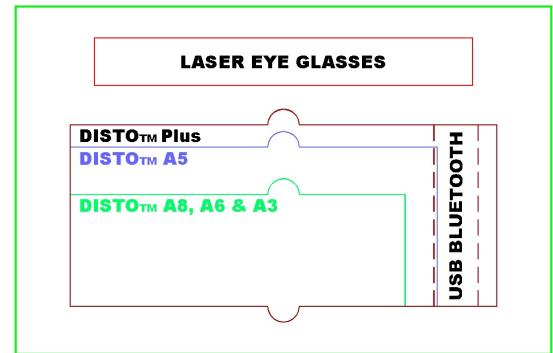

The foam insert has slots for a DISTO™ instrument, a pair of laser glasses and USB Bluetooth radio that can be used with the Leica DISTO™ A6 or PLUS.

The case is designed to be adjusted to fit the various dimension of the Leica DISTO™ family of laser distance meters.

To make the custom foam insert fit a particular DISTO™ instrument, all that has to be done is remove the required pieces of foam. To adjust the case for a DISTO™ A5, just remove the pieces labeled **DISTO™ A8, A6 & A3** and **DISTO™ A5**.

There is a special feature for the DISTO™ Plus. With all of the form removed, a foam block can be inserted under the tail end of the DISTO™ Plus to hold an USB Bluetooth module.

On orders of 25 units or more, a company logo or decal can be applied to the box free of charge. The logo or decal design and format must be provided in one of the following digital format BMP, TIFF, JPEG or GIF. The maximum size of the decal is limited to height of 1.5" and width of 4.0". The logo or decal is printed on waterproof white vinyl super permanent self adhesive material that will not smear when rubbed.

INSTRUMENT CASE LAYOUT

Specifications
